

Third Party Audits

NSF is an independent third party certification organization. In this presentation we will describe what a third party inspection means in relation to 1st, 2nd and 4th party inspections. As part of the presentation we will review some of the components of United States food safety system as it is structured today identifying areas of concern. The presentation will attempt to describe how the various parts of the food safety system might work together to achieve a common goal.

Wastewater Abstract

NSF has provided independent, third party assessment services to the onsite wastewater community for more than 40 years, enabling greater product acceptance, along with protection of public health and the environment. Today, NSF is the leading developer of performance-based American National Standards for onsite wastewater treatment technologies, providing comprehensive testing, auditing, field monitoring and certification of many treatment systems and components. This presentation will focus on the current research in the area of wastewater systems and the pending new standards that are being developed in the areas of Grey Water Reuse/ Recycling, Alternative Materials to Stone, and Standards for Field Evaluations.
